

Clark Forklift Attachment

Clark Forklift Attachment - Presently, there are at least 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 in service in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive brands of forklifts, with components covering more than 120,000 specific components for all of its automated equipment. Your local Clark Supplier is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark's extraordinary Parts Distribution Stores are conveniently stationed in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Internationally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a customary feature on every lift truck.

Clark has a unyielding mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental restrictions, thus placing them in a prevailing market position.

Clark has chosen the system of "Lean Manufacturing" at all of its assembly facilities for the reason that this system is extremely economical and allows for minimal use of resources. Developed to guarantee maximum proficiency, this system is intended to find and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing costs. The contemporary value engineering program combines progressive product growth and provides superior client support and service within the industry.
