

Electrical Part for Forklifts

Forklift Electrical Part - Forklifts may be specifically labeled to be used in unsafe sites. A labeled truck indicates the design has met the least standards of ANSI/UL 558 meant for engine powered trucks or ANSI/UL 583 used for electric forklifts for the type of label placed.

The application for labels utilized for lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas or Use, Maintenance and Operation, and Type Designations. Consult your local insurance provider and Fire Marshall for more info about the permitted uses of industrial powered trucks in your application.

If the specific lift truck meets the outlined standards, labels can be attached. A labeled forklift will show the type of designation placed on the nameplate and will have a correctly corresponding label put.
